

Pay Pool Administrator Advisory

2014-15

Issue Date: November 13, 2014

Topic: Compensation Management Spreadsheet (CMS) 2014 v4 Posted in Pay Pool Notices

Discussion: Version 4 of the CMS has been released. This version fixed a bug in the CMS that caused a run-time error when running Delta Statistics on a renamed Wildcard column.

There are 8 Wildcard columns in the Data worksheet on the CMS. You have the option to rename these columns. The Delta Statistics worksheet displays Delta OCS averages. There is an option to display the delta plot grouping on this worksheet by Wildcard column. In version 3 of the CMS, an error occurs if you select a Wildcard column that was renamed to view the delta OCS averages. Version 4 corrects this error.

Action: Use the updated CMS v4 found in Pay Pool Notices to facilitate pay pool deliberations going forward. If you do not intend to use a renamed Wildcard column as a selection for the Delta Statistics worksheet, then there is no need to do a roundtrip to use the updated spreadsheet. Version 3 has been deleted from Pay Pool Notices.
